OR Efficiency. It's About Time.

How these surgeons perform 12 joint cases by noon

The panelists have utilized a simple formula of radical time transparency coupled with operational excellence to change the productivity and efficiency of their ASC. As a result, they routinely perform 12 primary total joint cases by noon in two operating rooms. In this workshop, attendees will learn:

- What is radical time transparency?
- How to identify the root causes of inefficiency?
- What are some practice solutions to achieve operational excellence?
- What are the key drivers of surgeon efficiency?
